

The Tower at Port Royale
3200 Port Royale Drive North
Fort Lauderdale, Florida 33308

It is my pleasure to highly recommend Contich Construction, Inc. to develop, build or rebuild real estate property.

In the year 2010, Contich Construction completed an upgrade and beautification of The Tower at Port Royale Condominium lobby, entrances and associated common areas. This project included conforming to the recently revised building code standards.

At the conclusion of the pre-construction closed bidding process, it was clear that the cost savings indicated in the Contich projections were realized while maintaining identical job specifications as demanded.

The workmanship and strict control of the many elements involved were professional, efficient and thorough while completed in the highest regard and consideration of the many 230 families intertwined in the process.

As President of the Board of Directors during this period and the one person who most scrutinized the details, I am delighted to enthusiastically confirm the superior performance and results throughout.

Joseph Heinlein

Former President, Board of Directors

The Tower at Port Royale Condominium.

Former Commanding Officer

US Navy Underwater Demolition Team/US Navy Seal Team
